Description

para-methoxy-Butyryl fentanyl-d₇ (hydrochloride) (exempt preparation) (Item No. 36588) is intended for use as an internal standard for the quantification of para-methoxy-butyryl fentanyl (Item Nos. 19632 | 18089) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

para-methoxy-Butyryl fentanyl is categorized as an opioid.¹ para-methoxy-Butyryl fentanyl-d₇ is regulated as a Schedule I compound in the United States. para-methoxy-Butyryl fentanyl-d₇ (hydrochloride) (exempt preparation) (Item No. 36588) is provided as a DEA exempt preparation. This product is intended for research and forensic applications.
