

PRODUCT INFORMATION

iFluor® 488 Tetrazine

Item No. 44069

FW: 828.8
Purity: ≥90%
Ex./Em. Max.: 491/516 nm
Supplied as: A solid
Storage: -20°C
Stability: ≥4 years
Special Conditions: Light sensitive

Information represents the product specifications. Batch specific analytical results are provided on each certificate of analysis.

Laboratory Procedures

iFluor® 488 tetrazine is supplied as a solid. A stock solution may be made by dissolving the iFluor® 488 tetrazine in the solvent of choice, which should be purged with an inert gas. iFluor® 488 tetrazine is soluble in DMSO.

Description

iFluor® 488 tetrazine is a fluorophore functionalized with tetrazine, which reacts with *trans*-cyclooctene (TCO) to form a stable conjugate. It displays excitation/emission maxima of 491/516 nm, respectively. iFluor® 488 tetrazine can be used for labeling TCO-modified biological molecules for fluorescence imaging and other fluorescence-based biological applications. It has been used to visualize pore architecture in cryogels functionalized with norbornene.¹

WARNING

THIS PRODUCT IS FOR RESEARCH ONLY - NOT FOR HUMAN OR VETERINARY DIAGNOSTIC OR THERAPEUTIC USE.

SAFETY DATA

This material should be considered hazardous until further information becomes available. Do not ingest, inhale, get in eyes, on skin, or on clothing. Wash thoroughly after handling. Before use, the user must review the [complete](#) Safety Data Sheet, which has been sent via email to your institution.

WARRANTY AND LIMITATION OF REMEDY

Buyer agrees to purchase the material subject to Cayman's Terms and Conditions. Complete Terms and Conditions including Warranty and Limitation of Liability information can be found on our website.
