Laboratory Procedures

C18 Ganglioside G_{T1b}-d_7 (d18:1/18:0-d_7) is intended for use as an internal standard for the quantification of C18 ganglioside G_{T1b} by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated *versus* unlabeled).

Description

C18 Ganglioside G_{T1b} is a ganglioside containing stearic acid (Item No. 10011298) as the acyl chain. *As this product is derived from a natural source, there may be variations in the sphingoid backbone.*
