Description

Gabapentin-d₁₀ (Item No. 46720) is intended for use as an internal standard for the quantification of gabapentin (Item Nos. 37860 | 41131 | 22910) by GC- or LC-MS. The accuracy of the sample weight in this vial is between 5% over and 2% under the amount shown on the vial. If better precision is required, the deuterated standard should be quantitated against a more precisely weighed unlabeled standard by constructing a standard curve of peak intensity ratios (deuterated versus unlabeled).

Gabapentin is categorized as an anticonvulsant and analgesic.¹ This product is intended for research and forensic applications.
